How to **Search** for a Word on a Webpage

[Edit Article](#)

edits by: Chloe, Teresa, Hinni (see all)

Searching for a specific word or phrase is simple on any browser. Here's how!

Steps

[Edit](#)

- 1** Determine your **search** query. You can type in a word or a string of words to **search** for them. If you have a specific phrase, you may want to enclose them in quotation marks ("") to let your browser know that it should only **search** for those words together.
- 2** On a Mac, press **command+F** to bring up the **search** bar. On a PC, press **ctrl+F** to bring up the **search** bar.
- 3** Type in your **search** query. Click **search**.
